Nanotech Energy Eye Care

K-lonSpec

Modern Lifestyle and Vision Health

Everyday, we use computers, laptops, televisions, smart phones, tablets and so on, in office and at home for work and leisure. We heavily rely on the devices that most of us are spending more than 10 hours a day in front of these electrical devices. In fact, the rays emitted from computers and audio visual products are harmful to our eyes, and because of constant and prolonged exposure to these rays, our eyesight may become poorer and many eye conditions may start to appear.

The eye conditions that people commonly suffer from include astigmatism, cataract, glaucoma, myopia, presbyopia, floaters, dry eye syndrome and more.

We know the importance of caring for our eyes, but it is hard to tolerate the quality of life just to protect our eyes. And due to our busy and hectic lifestyle, it also seems not possible for one to visit ophthalmologists frequently or adopt complex eye care method.

Here comes the easy and effective solution : K-lonSpec

How it works

K-lonSpec's patented material and nano technology release Far Infrared Rays and Anions that can promote blood circulation and metabolism around the eyes, which help prevent and improve common eye problems. It also helps soothe the eyes and relieve tiredness by increasing oxygen supply to the eye area.

Recommendation

For best result, wear K-lonSpec for 8-10 hours per day.
