

Booster

AVISHKAR KA CHAMATKAR

*Special Formula
for achieving
Higher Yield*

K – BOOSTER is an eco-friendly, non toxic product manufactured from natural sources. A truly novel, power packed formula combining Potassium Humate with inherent nutrients & a premium surfactant to obtain optimum & healthy crop output. The premium surfactant helps in better dispersion of nutrients in the spray solution. Nutrients are derived from organic matter which is rich in mineral & organic substances essential for healthier plant growth.

K-BOOSTER (5-litre)

K-BOOSTER (1-litre)

7 STARS of K BOOSTER

Application : As a premium nutritional growth stimulant and supplement for healthier crops and yields.

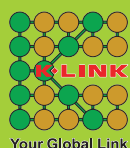

How to Apply : Mix the required quantity thoroughly in sufficient amount of water & spray / sprinkle on both the sides of the leaves / affected areas.

Dosage : 2ml per litre of water.

Benefits of K-Booster

- ◆ Improve and optimize the uptake of nutrients and water by plants.
- ◆ Act as natural chelator for metal ions under alkaline conditions and promote their uptake by the roots.
- ◆ Rich in both organic and mineral substances essential to plant growth.
- ◆ Retain water soluble fertilizers in the root zones and reduce their leaching.
- ◆ Promote the conversion of nutrient elements (N, P, K + Fe, Zn and other trace elements) into forms available to plants.
- ◆ Liberate carbon dioxide from soil and enable its use in photosynthesis.
- ◆ Help to eliminate chlorosis due to iron deficiency in plants.
- ◆ Potassium Humate biologically stimulates the plant and the activities of micro-organisms.
- ◆ Stimulate plant enzymes and increase their production.
- ◆ Stimulate growth and proliferation of desirable micro-organisms in soil.
- ◆ Stimulate root growth, especially vertically and enable better uptake of nutrients.
- ◆ Promote the development of chlorophyll, sugars and amino acids in plants and aid in photosynthesis.
- ◆ Increase vitamin and mineral content of plants.
- ◆ Stimulate plant growth (higher biomass production) by accelerating cell division, increasing the rate of development in root systems and increasing the yield of dry matter.
- ◆ Helps in absorption of mineral nutrients in plants even in unfavorable conditions like drought, and thus helps to fight the effect of drought.
