LIQUID CHLOROPHYLL

K-LIQUID CHLOROPHYLL

The main source of Liquid Chlorophyll for commercial extraction is the Alfalfa plant which is called as FATHER OF ALL FOODS. Chlorophyll can be consumed by everyone daily and it is an American Product.

Chlorophyll is the green colouring matter found in all leafy green plants and vegetables. It is often referred to as the "BLOOD OF PLANTS".

Though it is available in all green plants it is more abundant in Alfalfa plant containing purple flower. Alfalfa plant contains more of minerals, fibre, anti-oxidant, vitamins, proteins and Beta carotene (which prevents cardiac diseases and cancer).

The Alfalfa plant is an extremely hardy plant. The spread of the roots itself can be more than 10 meters and it can reach as much as 30 meters underground. That is why it can go deep in the ground and absorb all the high quality minerals compare to other plants and that is the reason it is absorbed by all the parts of the body.

NATURAL HEALTH DRINK

Alfalfa plant is cultivated in hygienic gardens where artificial fertilizers are not used. It is grown naturally and that is the reason why chlorophyll extracted from this plant is more hygienic than from any other extractions.

Professor Hans Fischer (Noble prize Winner) research proved that the chlorophyll and red blood cells structure are similar in the molecular chemical structure that helps to increase the red blood cells in our body.

Benefits of taking Chlorophyll

- Inhibits bacterial growth
- Improves oral health
- Strengthens Immune system
- Eliminating body odor
- Delays ageing process
- Balances acid and alkaline levels
- Increases red blood cells
- Provides iron to organs
- Soothes sore throat
- Abates the risk of bronchitis
- Enhances metabolism
- Abates digestive problems
- Detoxifies blood
- Stabilize body temperature
- Controls the blood sugar level
