In the morning, you will experience smooth passage of bowels, relief from gas and heaviness in stomach.

For maximum benefit, continue for 10 weeks or more.

K Ayurveda

K-Lax

K-Lax contains Cassia angustifolia, it is an excellent laxative very powerful, used in the treatment of constipation, working through a stimulation of intestinal peristalsis. Cassia Angustifolia

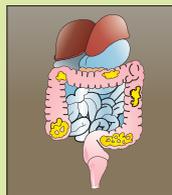

- ◆ British and US pharmacopoeias recognize it. It is useful in habitual costiveness.
- ◆ It lowers bowels, increases peristaltic movements of the colon by its local action upon the intestinal wall.
- ◆ It is used as expectorant, wound dresser, antidysentric, carminative and laxative.
- ◆ The medical action of senna can be attributed mainly to the anthraquinone glycosides, especially sennoside A and B.
- ◆ The breakdown of the anthraquinone glycosides in the digestive tract can occur in two ways. One; The glycosides are not absorbed in the upper gut but are converted by the micro flora of the large intestine into active agylcones principally rhein anthrone, which exert a laxative effect on the colon.
- ◆ Alternatively, in the presence of bile and the sugar, the free agylcone can be absorbed into the blood stream and secreted later into the colon. The final result is stimulation of the Auerbach Plexus resulting in increased intestinal muscle contraction.
- ◆ In addition, its mucilage content decreases absorption of fluid leading to an enhancement of the final laxative action.
- ◆ Its action being chiefly on the lower bowel, especially suitable in habitual costiveness. It increases the peristaltic movements of the colon by its local action upon the intestinal wall.
- ◆ It's a safe laxative.
- ◆ The primary chemical constituents of Senna include anthraquinone glycosides (sennosides, aloe-emodin, thein), betasitosterol, falvones, tartaric acid, mucin, essential oil, mucilage, tannin and resin.
- ◆ Senna is considered a "Cleansing" herb because of it's cathartic effect and has been used as a natural laxative for centuries.
- ◆ Senna is very effective in the treatment of constipation, working through a stimulation of intestinal paeristalsis. The sennosides are irritating to the large intestine lining, causing peristaltic action and bowel evacuation.
- ◆ Senna also helps to temporarily prevent fluid from being absorbed from the large intestine, thus contributing to softer stools.

Terminalia Chebula Haritaki: mother of all herbs

Ancient texts have described it to be gentle and caring like a mother haritaki is primarily digestive, carminative and laxative in nature. It stimulates liver functions, corrects metabolism, kills intestinal worms and is also known for its anti-inflammatory, wound healer, anti-obesity, it helps in the loss of appetite, indigestion, upward flow of abdominal gas and piles.

Haritaki is best used to clear bowels. It contains a constituent, which has a wide anti-bacterial and antifungal spectrum. The oil in the terminalia chebula kernel increases the motility, of the gastrointestinal tract. Harade possesses laxative, astringent, lubricant, antiparasitical, alterative, antispasmodic and nervine properties. It is therefore used to treat acute and chronic constipation. Haritaki increased the frequency of stools and has got the property of evacuating the bowel completely.

So with K-Lax your system will be clean, it's a cleanser, which works internally. Thus, the toxins are flushed out from the body.
