# MESSAGE FROM K-LINK GROUP MANAGING DIRECTOR

## Dato' Dr. Darren Goh

This K-LINK Communique Bulletin is dedicated to the millions of our direct sellers around the world, whose relentless efforts have given K-LINK a strong Brand Equity in the global marketplace.

In the Indian market, I always regard K-LINK as a Brand Ambassador for Malaysia, showcasing the country's best business practices and cultural ethos. Malaysia and India have had strong commercial ties since the dawn of time, and our world-class products and Direct Selling Business Opportunity will strengthen and advance those ties.

K-LINK has created a culture of innovation and intellectual knowledge harnessing that is in line with global commercial development. It has modified its business strategy to match the Indian market, with product lines customized to the interests and tastes of Indian consumers.

We at K-LINK believe in the Indian market and consider it to be one of the few large market economies with significant growth potential. K-LINK is working industriously to increase its presence in the Indian market, and has launched business opportunity outreach initiatives specifically for Indian women and youth.

Adaptability, flexibility, and integrity in its business commitments with members are the operative mantras for K-LINK in its market expansion approach. We are a forward-thinking, progressive Direct Selling Company that stays current with developments in the business environment.

In India, K-LINK has made a concentrated effort to empower women by providing them with life-changing skills that would not only help them become exceptional K-LINK direct sellers and also transform them into leaders in their communities.

I would like to highlight & credit Team India's commitment, foresight and perseverance, as well as their ability to come up with innovative solutions.

With deep abiding admiration to all K-LINK Members.

**Dato' Dr. Darren Goh**  
Group Managing Director

# DIRECTOR DESK

**Mr. Jegiathesan Subramaniam**  
Director of K-LINK India

At the Outset, I want to congratulate everyone on their accomplishments and adaptability in the rapidly evolving fluid marketplace. I am proud of the resilience shown by K-LINK during these testing times. K-LINK has implemented paradigm change in its market approach for India.

We have been successful in turning the pandemic into a bankable opportunity through our various initiatives. First initiative was ensuring in having a proactive communication with our direct sellers every day through different mediums of communication platforms. This one change in working methodology was a huge success which enabled us in achieving incremental sales and spread our business opportunity far and wide with all our members.

Our other step included intellectual harnessing of direct sellers through orientation training programs which included product knowledge sessions that provided hands on training on the nuances on product demonstration and presentation. Business efforts were amplified by social media platforms to increase daily sales.

Witnessing the engrossment of K-LINK direct sellers towards online platforms for interacting with prospects, we are

concentrating on many more training sessions through online modes. To augment our sales network created by dedicated direct sellers, we are up-skilling the entire K-LINK team in India to adapt themselves to the necessary digital tools.

Seeing the surge in demand for health care products, we as K-LINK firmly believe in creating a portfolio of useful and beneficial products which can help us grow our business collectively. On that note I would also like to share that we have launched a new product K-Moripro, a protein drink. To rev up the spirits of entire K-LINK India, empowerment is the call of action taken to liven up our efforts. We emphasize on continuous learning and encourage our direct sellers to always be in the pursuit of updating themselves with the changes which are shaping the business ecosystem. 2022 will be the defining year for K-LINK in its overall operations in the Indian market.

As we observe Women's Day in March, I would like to emphasize that this is a special day for the humanity. It is a clarion call towards self-reliance and independency of women and it lays the foundation for equitable and progressive society.

Let's soak ourselves in this year's International Women's Day campaign theme which is #Break the bias: and imagine a gender equal world, which is free of stereotypes.

With personal gratitude to the entire K- LINK family

## Mr. Jegiatheson Subramaniam

Director of K-LINK India

# EDITORIAL

Mrs. Shanthini Pillai

I am delighted to share the third issue of K-LINK Communique Bulletin with all of you. This issue includes new product launches, section on Time Management; an essential toolkit and explore the benefits of walking with K-LINK, triumphant tales of direct sellers and K-Activities.

At K-LINK, we specialise in the research and development of cutting-edge consumer health products. K-Moripro, our latest product, is a protein health drink which has moringa extracts and amino acids which provides natural energy to strengthen the overall body.

The virus is still around , and we all need to vitalise our immunity to get through this stage. Hygiene plays an important part in protecting us from viruses. K-LINK has introduced cleaning solutions for the house and kitchen which will assist in maintaining a germ-free environment.

Our direct sellers and business partners are always willing to share their market knowledge with us, allowing us to fine-tune our market approach plan. We feature inspirational stories from our direct sellers in our Triumphant Tales section. Do read it and internalize and adopt what works for you to create a sales network of extremely skilled direct sellers.

Direct selling industry provides an empowering opportunity for women to self-actualize their potential through selling products from comfort of their homes. Value creation done by them is helping the society and the community. There are numerous success stories of women who have developed strong sales network in the region. I would like to congratulate all women on their achievements on International Women's Day i.e. March 8th, and let's together beat the bias which is the theme for 2022.

All of us can benefit from our section on Time Management which teaches us how to use our time judiciously in our pursuit of becoming a highly productive professional.

**Do write to us and share your feedback at:  
[shanthini@klinkindia.in](mailto:shanthini@klinkindia.in)**

Yours truly,

A handwritten signature in black ink, appearing to read 'shf'.

**Mrs. SHANTHINI PILLAI**

# K-MORIPRO

*Protein drink*

(200 GMS)

*Protein everyday keeps you in a healthy way!!*

K-Moripro Protein Drink mainly consists of Protein and Moringa Extract which gives various health benefits in maintaining our body.

## PROTEIN:

Proteins are fundamental structural and functional elements within every cell of the body and are involved in a wide range of metabolic functions. All cells and tissues contain protein, therefore protein is essential for growth and repair and also for the maintenance of good health.

## MORINGA EXTRACT:

Moringa Extract is rich with amino acids which provides natural energy and also controls diabetes and provides healthy cardiovascular health. Supports brain for better functioning. It makes bones & muscles stronger. It also maintains health balance of fluids in the body.

## BENEFITS:

- It is a highly protein filled powder of Natural Resources.
- It is mainly enriched with Moringa Extract which is rich with Protein, Calcium, Vitamins & Minerals.
- Also enriched with Flaxseed, Alpha Lipoic Acid, Green Tea Extract, Cinnamon, Inositol, Choline, Taurine, Multivitamins & Multiminerals.
- It is a Chocolate Flavoured & Sugar Free protein powder which meets the nutritional requirements and even childrens can take it like a health drink.
- The main advantage of this product is that, no smell of vitamins or minerals while consuming and no belching smell.

## DIRECTIONS FOR USE:

- Take 15 gm of K-MORIPRO powder in a cup.
- Add a little warm water/milk. Stir till smooth & creamy.
- Fill up warm water/milk & a delicious K-MORIPRO drink is ready.

**K-HOME**  
MAGIC

**DISHWASH**  
LIQUID

**FLOOR**  
CLEANER

**TOILET**  
CLEANER

**K-SHINE &**  
SPARKLE

WITH TESTIMONY

**K-HOME**  
MAGIC  
DISHWASH LIQUID

All we want is a powerful and reliable product, with a five star reputation that effectively removes food residues, degreases, and leaves a shiny finish. K-Home Magic Dishwash Liquid is great to use and i absolutely love the fragrance. It rinses totally clean, and leaves your dishes with a fresh lemon fragrance.

- Mrs. Alpana Das - (West Bengal)

**K-HOME  
MAGIC  
FLOOR  
CLEANER**

I am extremely pleased in the quality of cleaning the floors and in the price. They leave my house not only super clean, but with a natural rose fragrant and delivers a non-chemical smell of a newly spiffed up house. Using K-Home Magic Floor Cleaner on a regular basis gives my house floor a clean and sparkling shine like the one in my mirror.

- Ms. Paulami Sarkar - (West Bengal)

**K-HOME  
MAGIC  
TOILET  
CLEANER**

Works very effectively! Super powerful in removing stains and Germs. This is by far the best product for toilet cleaning purpose. It is very effective in controlling the stains and odour. I recommend you all to try this Toilet Cleaner atleast once and you wont regret using it more often in the future. Thank god, the price is very affordable compared to the other toilet cleaners in the market.

- Mrs. Anuradha Singh - (Bihar)

**K-SHINE &  
SPARKLE  
2 IN 1  
DETERGENT POWDER  
(1 Kg)**

I have been using this Detergent Powder for the past 3 months and i could see magical results in my clothes. They smell really good and my clothes don't fade much even if i use the powder for Machine wash. Infact, my neighbours asked for a sample one due to the over whelming smell of K-Shine & Sparkle Detergent Powder in our clothes kept for drying out in the terrace and i am glad, i sold them to some more people in our colony too.

- Mrs. Rinku Mukherjee - (West Bengal)

Tried all of these cleaning products for the first time. Its Definitely worth it considering what you are paying for. Value for money and overall good cleaning products with nice fragrance after usage. Its an absolute value for money compared to other cleaning products out in the market!

Mrs. Monika Dutta - (West Bengal)

# TIME MANAGEMENT THE ESSENTIAL TOOLKIT

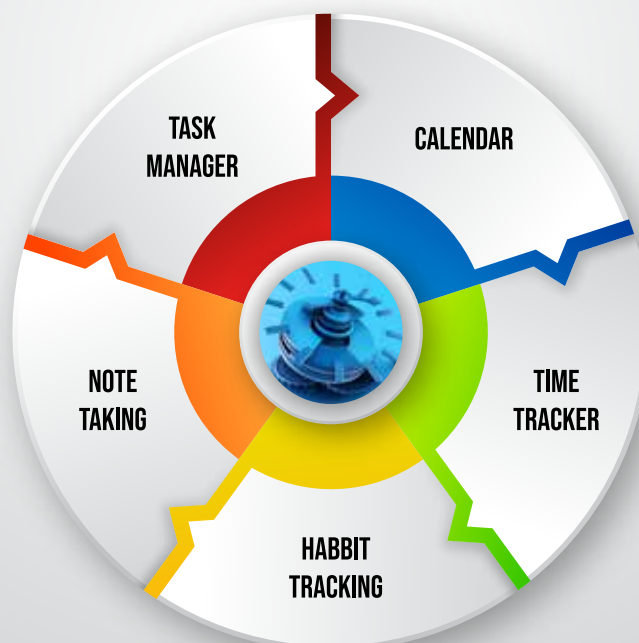

Modern life is defined by 24X7 working schedules, we all have plenty of things on our platter. During these stressful times, Time Management has become a nirvana which is elixir to leading a productive and happy life.

We all lead a hurried life and have tight timelines and learning the art of Time Management helps us in leading a focused life. K-LINK offers you the mantras of Time Management, which will give the spring in your steps and help you start your day on a positive note.

Leaders who became great human brands have been known to be stickler of time and their exemplary lives inspires us to practice Time Management Skills.

Time Tested 5 Commandants of Time Management which will give zest and enable you to rock in your activities.

01

**CALENDAR**

A calendar is a time management tool that allows you to better manage your time. Using a calendar can assist you in becoming more organised. Make a calendar for the next few weeks in advance. Make a list of tasks you need to finish by the end of the month and prioritise them. Then there are the other crucial activities, such as group meetings and phone calls.

02

**TASK MANAGER**

Use a task management app to reserve time blocks for the most important tasks. Through the medium of these apps, you can keep a virtual record of the things that you need to do. Differentiate between urgent, important, not urgent, and not important tasks in the app.

03

**TIME TRACKER**

Time trackers allow you to analyse how you spend your time, which helps you be more productive. You can keep track of your time on your phone by setting up alarms for different tasks. Harvest, Toggl Track and timely have been used millions of people. Try these apps and adopt what works best for you.

04

**NOTE TAKING**

Note-taking is also one of the ways through which you can optimise your time. You can use it to write down your goals, keep meeting minutes, keep all references and articles in one place, keeping the digital version of essential documents.

05

**HABIT TRACKING**

Social media has the potential to eat up a lot of your time. You can utilise habit-tracking software, distraction-blocking software, and automation solutions, among other things.

**TIME MANAGEMENT**  
THE ESSENTIAL TOOLKIT

# EXPLORE THE BENEFITS OF WALKING WITH K-LINK

As the true old proverb goes i.e Health is wealth, it is essential for us to preserve our health. Easiest way to do this is by adopting walking in our daily routine. It is absolutely true that walking daily is significantly beneficial to people of all ages and fitness levels. Walking is free and does not require any special equipment or training. Radiance & glow is an outcome of walking.

Let us learn how walking and through daily usage of K-LINK products we can have a balanced lifestyle

We all have a desire for having a balanced weight and becoming more productive in carrying out our day - today activities. K-LINK's BIOFIBER helps in lowering cholesterol while you take your strides during your morning walk.

Walking protects your knees, hips, joints and lubricates your muscle. It helps in relieving the pain and is beneficial for everyone, not just arthritis patients. Try today K-Cal Plus, it helps in maintaining strong bones and healthy muscles and do give feedback on it.

Our Immune system becomes strong by walking and it reduces the risk of catching the cold and flu. Remember to detoxify your body and maintain energy levels through a range of Health Drinks by K-LINK: K-Herbal Tea, K-Liquid Chlorophyll, and K-Liquid Spirulina.

By adopting walking as a daily habit, we are preserving and conserving our energy levels. Walking aids in oxygenating the body and for that K-LINK has recently launched K-Moripro Protein drink with moringa extract.

Now let's know the scientific validation on walking:

Studies have shown that walking balances hormones such as cortisol, adrenaline, and norepinephrine. All you have to do is to go for a 30-minute walk every day to promote your cardiovascular health and strengthen your heart. Make it a habit to walk seven days a week to lower your risk of coronary heart disease by 19%. Now is the time to get ready to walk large distances and strengthen the heart's muscles and arteries leading to a robust body in spirit and health.

Walk ..... Walk .... and Walk extra mile and ingrain this habit to lead healthy, contented life filled with achievements.

About  
**K-LIQUID  
CHLOROPHYLL &  
K-LAX**

**Dr. ROOPAM BHATT**

Director – Welex Laboratories

Chlorophyll can be found in all green plants. This includes leafy greens and other veggies we commonly eat, plus certain types of algae or bacteria. While chlorophyll is totally natural, a similar semi-synthetic mixture called chlorophyllin is made in laboratories to be used in supplements, such as those marketed as “K-Liquid Chlorophyll.” These supplements have been in existence for more than 50 years and are commonly used to treat skin wounds, body odour, digestive problems, other health concerns with practically no side effects at all.

The chlorophyll definition is “the green substance in plants that makes it possible for them to make food from carbon dioxide and water.” There are two main forms of Chlorophyll found in nature: Chlorophyll-a and Chlorophyll-b. There is a small difference between the two types, basically that each absorbs light from the sun at slightly different wavelengths. In natural plants containing Chlorophyll, there is a ratio of 3:1 Chlorophyll-a (a bluish-black solid) to Chlorophyll-b (a dark green solid), which both work together to reflect the dark green pigment that’s visible to the human eye.

Plants and algae use Chlorophyll to trap light from the sun that’s needed for photosynthesis, which is why Chlorophyll is considered a “chelate.” In fact, it’s considered the single most important chelator found in nature, since it gives plants energy, which then give us energy.

Chlorophyll-a and Chlorophyll-b are both fat-soluble, meaning they won’t dissolve in water and are absorbed by the digestive system best when they’re consumed with at least a small amount of fat (lipids). Synthetically made Chlorophyllin is soluble in water, however, which means you can take a Chlorophyllin supplement without needing to eat a source of fat to fully dissolve it.

On a molecular level, the structure of Chlorophyll is very similar to heme, which is a part of haemoglobin present in human blood. Heme, which is what makes blood appear bright red once exposed to oxygen, is bound to proteins forming haemoglobin. Haemoglobin carries oxygen to the lungs and other respiratory surfaces to be released into tissues throughout the body. It is a well-known fact that plants cannot survive without Chlorophyll. Thus we can wonder about the benefits of Chlorophyll for us human beings.

K-Liquid Chlorophyll helps to neutralize oxidants, which means effectively decrease oxidative damage caused by factors like a poor diet, chemical carcinogens, UV light exposure and radiation.

K- Liquid Chlorophyll is manufactured from finest Alfalfa plant which has its roots 30ft below ground. This Chlorophyll from fresh green leaves of Alfalfa has potent anti-inflammatory activities against dangerous bacteria and other environmental toxins. It helps turn off a pro-inflammatory cytokine called lipopolysaccharide - induced TNF- $\alpha$ , making it a promising treatment option for inflammation and related chronic diseases that conventional medicine has failed to control.

Another one of the big benefits of K-Liquid Chlorophyll comes as a surprise. It helps to promote weight loss by controlling appetite hormones and improving obesity-related risk factors, all without the scary side effects of most commercial weight-loss supplements.

The primary reason why K-Liquid Chlorophyll is considered a superfood is because of its strong antioxidant and anticancer effects. Chlorophyll benefits the immune system because it’s able to form tight molecular bonds with certain chemicals that contribute to oxidative damage and diseases like cancer or liver disease. These are called “procarcinogens” substances, and some of the types that Chlorophyll can help block include:

- Polycyclic aromatic hydrocarbons found in tobacco smoke
- Heterocyclic amine toxins found in meat cooked at high temperatures
- Food-born toxins, including aflatoxin-B1, a type of dietary moles (also called a fungus) found in many grains and legumes, such as corn, peanuts and soybeans.
- UV light that can cause skin damage in excess

# DETOX

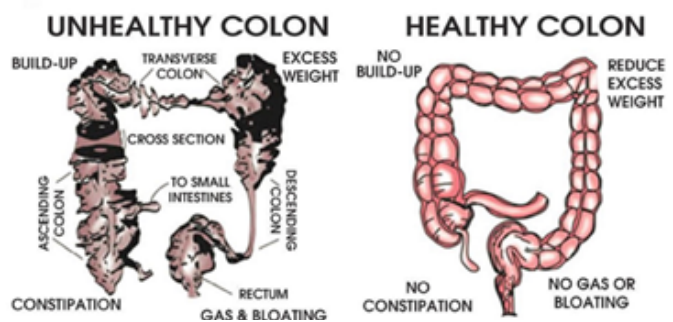

## A DAILY NECESSITY

Detoxification means to eliminate toxins from our body to improve our health, build our immune system as a preventative measure against any kind of viruses, infections, or ailments. This involves the use of laxatives, diuretics, other foods thought to have detoxifying properties.

The Ayurvedic system lays much importance to eliminate the bowels on daily basis. Constipation is a major cause of accumulating toxins in the body.

Is an unhealthy colon making you sick?

Build up toxins in our body can cause deadly diseases, due to

- High meat intake on daily basis
- Lack of vegetables and fruits in our diet
- Sedentary lifestyle
- Medication and bowel diseases
- Excessive intake of tea and coffee

It is very important to excrete the bowel on daily basis So, the first and foremost important Product for Detoxification is K-Lax.

K-Lax Capsules acts gently to flush the bowels out, relieving the person from constipation. It cleanses the stomach of unwanted elements as well as toxins.

**K-Lax contains extract of herbs like**

### Cassia Angustifolia

It is an excellent laxative  
Effectively treats constipation  
Stimulates intestinal peristalsis

### Operculina Turpethum extract

Helps by strengthening the gastric mucosa  
Reduces the stomach wall friction during peristalsis and gastric contraction  
An antioxidant, reduces mucosal damage mediated by free radicals.

### IMPORTANCE OF K-LAX

- Detox's and cleanses the colon
- Relieves constipation
- Cleanses and tones the intestines
- Flushes and cleanses the body of unwanted elements and toxins
- Allows smooth passage of bowels
- This wonder product shows result within 8 to 10 hrs
- Helps control weight
- Keeps you fresh and healthy
- Non habit forming

**Mr. RAVINDRA NAMBIAR**

Managing Director - Cropex Private Limited

# **K-BOOSTER**

**“THE POWER-PACKED WONDER NUTRIENT”**

K-BOOSTER, containing humic and fulvic acids in the form of potassium humate extracted from the highly bio-active organic substrate, Lignite, inherently contains several important nutrients. Backed up with the powerful support of Organic Approval under NPOP norms by an International Certification agency, IMO, K-Booster has lot to offer in terms of nutritional support to the better growth and higher yields.

## K-BOOSTER : LIQUID & GRANULES

K-Booster – a unique dynamite of nutrients from organic rich substrate is offered in two forms: Liquid & Granules – for supplementing the nutrients to plants as well as soil with significant benefits. K-Booster increases the availability of nutrients. When humic, fulvic acids and humate enter plants at early stages of development, they result in increased cell division, root development and eventually dry matter, they act as respiratory catalyst, act as natural chelator for metal ions under alkaline conditions, convert nutrients into forms available to plants, protect plants from chlorosis and increase the permeability of plant membranes. They also decrease plant stress and increase the quality of yields. Nutrients in K-Booster physically modify the structure of soil, chemically change the fixation properties of the soil and biologically stimulate the plant and the activities of micro-organisms.

**The numerous benefits of this combination formula can be listed as below:**

- Humic acids chemically change the fixation properties of the soil.
  - Neutralize both acid and alkaline soils; regulate the pH-value of soils.
  - Improve and optimize the uptake of nutrients and water by plants.
  - Increase buffering properties of soil.
  - Act as natural chelator for metal ions under alkaline conditions and promote their uptake by the roots.
  - Rich in both organic and mineral substances essential to plant growth.
  - Retain water soluble inorganic fertilizers in the root zones and reduce their leaching.
  - Possess extremely high cation-exchange capacities.
  - Promote the conversion of nutrient elements (N, P, K + Fe, Zn and other trace elements) into forms available to plants.
  - Enhance the uptake of nitrogen by plants.
  - Reduce the reaction of phosphorus with Ca, Fe, Mg and Al and liberate it into a form that is available and beneficial to plants.
  - The productivity of particularly mineral fertilizers is increased considerably.
  - Liberate carbon dioxide from soil calcium carbonate and enable its use in photosynthesis.
  - Helps to eliminate chlorosis due to iron deficiency in plants.
  - Reduce the availability of toxic substances in soils.
  - Humic acids biologically stimulate the plant and the activities of micro-organisms.
  - Stimulate plant enzymes and increase their production.
  - Acts as an organic catalyst in many biological processes.
  - Stimulate growth and proliferation of desirable micro-organisms in soil.
  - Enhance plant's natural resistance against disease and pest.
  - Stimulate root growth, especially vertically and enable better uptake of nutrients.
  - Increase root respiration and root formation.
  - Promotes the development of chlorophyll, sugars and amino acids in plants and aid in photosynthesis.
  - Increase vitamin and mineral content of plants.
  - Thicken the cell walls in fruits and prolong the storing and shelf time.
  - Increase germination and viability of seeds.
  - Stimulate plant growth (higher biomass production) by accelerating cell division, increasing the rate of development in root systems and increasing the yield of dry matter.
- 

Being organic in nature, K-Booster is free of any harmful substances and does not contaminate groundwater or soil and is environmentally safe. On the contrary, Humic Acids in K-Booster reduce the availability of toxic substances in the soil, prevent that nitrate and pesticides mix in with ground water and decrease the use of fertilizers. They also reduce the over-salination problem created by some of the water-soluble mineral fertilizers and are an effective means in erosion control.

## APPLICATION

K-Booster Liquid and Granular formulations give best results when sprayed or broadcasted during the critical periods of the crop growth. Generally, the critical periods coincide with peak vegetative, flowering and fruiting phases. K-Booster Liquid is generally applied at 2-3 ml per litre of water while the K-Booster Granules are broadcasted in the field at 8 kg per acre. The minimum water requirement for foliar spraying is 200 litres per acre in a hand-held knapsack sprayer.

## PACK SIZES

K-Booster is available with K-LINK distributors in convenient pack sizes of 250 ml, 1 litre and 5 litre for the Liquid and 4 kg bags for Granules.

# TRIUMPHANT

# TALES

**Mr. SYAM PRAKASH**  
(K-LINK Crown Ambassador)

## My 20 years of journey with K-LINK

It all started in 2002 accidentally. I never thought that K-LINK was going to be an integral part of the rest of my life, when I was sponsored by Mr. Jayakumar from Chennai. In fact, he was not really sponsoring me in K-LINK, instead he was opening a door full of possibilities for a meaningful and inspiring journey. And I am still continuing my journey happily.

I am proud of myself because I am now associating with the 3rd Gen distributors who are technically more advanced and performing in K-LINK with a newer style. Every decade creates a new generation in direct selling and along with that new challenges also emerge. The new generation would gradually be equipped and trained to overcome the challenges and advance further to become visibly successful. Today I learn a lot from the generation of this decade in K-LINK who teach me to tackle the challenges of the digital marketing and other latest trends in Direct Selling.

At 62, I am healthier comparatively thanks to our outstanding, qualitative products. There has never been a day in my life since 2002, without using K-LINK products. Using our products gives confidence and conviction as the journey is not over yet. I have created a lot of satisfied customers across India and some of them continue to regularly purchase products from me ever since 2002! Thus doing K-LINK business has never been a difficult task to me.

I am lucky to have our HO in Chennai to stay well connected with it. Day to day communication with HO has strengthened my relationship with K-LINK Management and in turn I am able to reach my team mates, cater to their needs and render better service without delay. Frequent HO visits and utilizing the available training facilities as and when required, helped me strengthen my team both qualitatively and quantitatively. K-LINK Management has been flexible, generous, friendly, supportive and above all loving and caring. I am ever indebted to K-LINK Management, right from our Director to the bottom level employee of K-LINK.

I was an Indian Railway employee (Travelling Ticket Inspector) when I joined K-LINK in 2002. K-LINK gave me mental strength to voluntarily retire from Railways in 2003 when I was just 43 which I consider to be my boldest decision ever. K-LINK stood by me during my tougher times initially and brought me up by giving various trainings, tasks and opportunity to travel to more than 15 countries. This exposure helped me setting bigger goals and accomplishing many of my dreams. I have travelled to most of the states of India to conduct meetings and trainings. Every journey has helped me elevate my potential and capabilities.

My Malaysian upline Mr. Reko Rasu (Crown Ambassador) constantly communicates with me and my key leaders from Tamilnadu, Kerala, Karnataka, Goa and Nagaland keep very good relationship with me and follow the strategies designed for them in order to become successful in K-LINK. Today, my family and I together happily say "Thank you K-LINK! We love you K-LINK" and we are able to feel the same reciprocation from the other end too.

# K-LINK

# TRIUMPHANT

# TALES

**Mr. BISWAJIT PAL**  
(K-LINK Emerald Manager)

Thanks to K-LINK and all of my associates Members and Management Team.

At first I want to say thanks to K-LINK and our Honourable Director sir Mr. Jegiathesan Subramaniam for giving me opportunity to share my beautiful experience with K-LINK. My Son was suffering from asthma immediately after his birth. Now he is completely cured After using K-Liquid Chlorophyll. After that our entire family took that health benefit of our Health Care Products.

Then I have attended a K-LINK Seminar at Kalna and i have enjoyed entire programme but can't believe this opportunity. One day I accidentally met with my Great upline Dr. Pranav Kumar Ray (Crown Ambassador). One day after making an appointment we met together in his home, and then I have started my Part time journey. After one and half year, i have decided to do aggressively. By profession i was a successful well known creative artist. Then again we set and decided for one year project. I quit my old profession and Started as a full time Network Marketing professional. After 6 months, i faced typical financial crisis skipping my daily lunch to buy fuel for my bike. Still I am continuing my journey as networker and i never returned back to my old profession. My wife supported me alot, she has started stitching job in local area to support me. K-LINK education system trained me enough to get out of this situation and i continued learning and typical hard work is the key of my success. I have done lots of school seminars that made me a powerful speaker. Now i am an Emerald Manager and recently i have changed my bike to Honda Livo and Dream Car Honda Santro Sports and also bought special anniversary gift (Scooty) for my wife . Last 6 years, i am continuing Special Programme with our Team.

My Mission is to make people feel proud about Netwok Marketer. As per my knowledge and personal experience K-LINK Products, Marketing Plan and Management is the best in India. Continued Learning and Planned hardwork with a Goal is the Key of Success!!

I want to extend my gratitude to the K-LINK management team for their support.

AYURVEDA in the journey towards better health for women, offers many guidelines related to healthy food and lifestyle to be adopted during different important stages of her life. By using Ayurveda products, women can avoid illness and maintain her health status. Apart from these awareness and education of all women, beginning from adolescent period is very important. Removing the myths and stating the facts, helping in improvement of her over-all physical and psychological health will be a great benefit for her in the future.

It is the need of present era to understand and adapt Ayurveda in day to day life for avoiding consequences of faulty diets and lifestyle. All women should follow the regimen and directions described in Ayurveda for her wellness throughout the life. This will ensure a future with health to all girls and women irrespective of their social status.

In order to help women and to maintain their healthy life throughout life. Here is “BOON FOR WOMEN”, an Ayurvedic supplement that rejuvenates the system, enhances beauty, improves vitality and strengthens Urinary tract and regenerates kidney cells.

## K-VITA

K-Vita is a proven herbal tonic that rejuvenates the system, enhances beauty and improves vitality. It stimulates digestive process, promotes luster and glow to the complexion.

- Promotes strength and vigor.
- Its anti-oxidant properties delay the ageing process.
- Helps in general weakness.
- Helps in debility, ageing and stress induced disorders.
- Improves resistance against infections.
- Helps in genitourinary diseases, menorrhagia and leucorrhoea.

## K-RIN

K-Rin is a herbal combination that is highly recommended to remove build of toxins in the body caused due to metabolism of natural chemicals in the case of Urinary Tract Disorders.

- Improves Urine Flow.
- Strengthens the urinary tract.
- Acts as a urinary antiseptic and relieves inflammation.
- Helps in maintenance of sexual health and vitality.
- Clears the urinary tract infection.
- Excretes the toxins and small kidney stones.
