Why K-Derme?

Skin Problems mainly occur mainly due to overload of toxins in the body. Excess of toxins may also be deposited in the skin making it difficult for the sweat glands to deal with, resulting in common inflammatory skin conditions characterized by frequent episodes of acne, redness of the skin, itching, including thick, dry, silvery scales, superficial skin eruptions, dark spots etc.

When you use K-Glimmer oil along with K-Derme capsules, you will get better and faster results, and your skin will have that vibrant glow.
